Anemone Japonica
Flowers in variety

A FEW TERSE HINTS
as to the best Hardy Perennials
or Old-fashioned Flowers of merit
for general use and worthy of special atten-
tion; embracing many of the newer, besides
standard, sorts.

A NEMONE JAPONICA
Among the most beautiful of late flowering plants, and thrives almost anywhere; we think "Whirlwind," a semi-double white variety, is the most desirable sort and would appear the most popular although the colored varieties are very pretty. See general list for other varieties and price.

ACHILLEA, THE PEARL.

One of the best plants for cut flowers. Blooms continuously, double white flower on long stems, and remains fresh a long time in water, 3 inch pots. For price and other sorts see general list.

ASTERS, HARDY.

Our list of varieties of this desirable and popular plant contains all the improved and latest introductions to date, as well as standard kinds. For price and varieties see general list.

AEGROSTEMMA CORONARIA.

Flowers resemble Ten-weeks stock and contrast well with the silvery foliage, fine for cutting. Color bright crimson and white. See general list for varieties and price.

AGOPODIUM PODOGRARIA VARIEGATA.

Excellent variegated foliage, creeping plant that grows rapidly and is very useful for covering waste spots. See general list for varieties and price.

ALYSSUM SAXATILE COMPACTUM. Fl. Pl.

A double form of the well known Sweet Alyssum. Flowers golden yellow, and very showy. For price see general list.

AQUILEGIA HYBRIDA (Columbine).

An old favorite that succeeds in almost any garden but the Hybrids are such an improvement upon the ordinary Columbine that they must be seen to be fully appreciated. The COERULEA HYBRIDS contain light and dark blue, pink, white, and red shades and a bed in flower gives an iridescent effect that is difficult to produce with any other flower. See general list for price and other sorts.

ASTILBE DAVIDII

This is a new and desirable sort with graceful flowers, spikes 6 ft. high, of a reddish purple color, which contrasts well with the dark green foliage. Claimed by the introducers a most important addition

to this type of hardy plant. For price and other varieties see general list.

BOCCONIA CORDATA. (Plume Poppy.)

Certainly one of the finest herbaceous plants for a back ground or planting among shrubs. Grows 6 to 8 feet high. We have a large stock of this and when wanted in quantity, will quote special price. For price see general list.

BOLTONIA NANA.

A dwarf form of Latisquama, having all the characteristics of that variety, except that it does not grow higher than 15 to 18 inches and is covered with pink flowers. A new and desirable sort. See general list.

CAMPANULA PERSICIFOLIA GRANDIFLORA.

We consider this the finest of all the Campanulas, single white flowers, twice the size of the type, in great abundance, on stems 2 to 3 feet high. A most showy and permanent plant and succeeds almost anywhere. For price and other varieties see general list.

CHRYSANTHEMUM, HARDY POMPON.

Single and double Hardy Japan Chrysanthemums. Our selection of these useful and popular plants contains the best varieties of double and single flowers and at the low price we furnish reliable plants we annually supply large quantities to the trade. See general list for varieties and price.

CHRYSANTHEMUM MAXIMUM.

Shasta Daisy and other of Mr. Burbank's origin. We have a large stock of these very showy GIANT DAISIES which were produced from originator's stock and can be depended upon being true to name. See general list for varieties and price

Hardy Asters or Michaelmas Daisies
so glorious in the Fall

LILY OF THE VALLEY (*Convallaria Majalis*).

There is no more popular plant than this, which succeeds in almost any position in the garden. We offer strong clumps that will produce many flowers the first season. See general list for price.

COREOPSIS LANCEOLATA.

The rich golden yellow flowers on graceful long stems make this one of the best plants for the hardy garden and succeeds everywhere. See general list for other varieties and price.

DELPHINIUM or LARKSPUR.

Our hybrids of this very showy plant are grown from seed produced from the stock procured from English specialists and contain many distinct sorts equal to the expensive named varieties. We have both large field-grown clumps and plants from pots, customers' choice. See general list for price and different sorts.

DELPHINIUM SULPHUREUM (Zalil).

This variety is a superior and a most unique sort. Flowers of a clear sulphur yellow on strong stems 3 to 4 feet high and flowers very freely all summer. Fine for cutting. See general list for other varieties and price.

DIANTHUS (Hardy Garden Pinks or Carnations).

The Sweet William belongs to this class of plant, but it includes the old fashioned Clove or Scotched pinks. We have several varieties which run from pure white to pink and red. They make a constant show all through the summer and will adapt themselves anywhere. See general list for price and varieties.

DIGITALIS (Foxglove).

There is nothing more charming than a group or clump of Foxgloves rising from the masses of foliage. We offer them in separate colors, pink, white, spotted and rose or mixed, and our low prices for strong plants should attract. See general list for other sorts and price.

FUNKIA SUBCORDATA GRANDIFLORA
(White Day Lily).

The lily-like flowers with pleasing perfume makes this variety the best of the type. It makes a beautiful plant wherever placed and is much in demand. We have a large stock and highly recommend it as one of the best hardy plants in cultivation. See general list for other sorts and price.

FUNKIA MEDIA VARIEGATA.

The green and white foliage of this variety makes one of the best and showiest and popular hardy plants for borders. We have a large stock and our price is as low as they can be procured anywhere. See general list for other varieties and price.

EUPATORIUM AGERATOIDES and COELESTINUM.

The flowers of the blue variety of this native plant resemble closely the Ageratum and flowers the summer through. We can specially recommend the Coelestinum. For price and other varieties see general list.

GAILLARDIA GRANDIFLORA.

A very showy hardy plant that grows vigorously wherever placed and flowers the summer through. Large daisy-like flowers in great abundance, measur-

ing 4 inches across in a combination of colors from pale yellow to red and dark brown. See general list for other varieties and price.

GYPHOPHILA (Babies' Breath).

The small individual white flowers borne in great numbers upon large stems gives a maze effect and when mixed with ferns and other flowers, they make an admirable effect and remain fresh in water a long time.

HELIANTHUS MULTI-FLOREUS PLENUS
(Double Dahlia Sun-flower).

There is much to recommend the perennial sunflowers as they fit in all seasons, but in our estimation this is the best of the group either single or double and no one would make a mistake in recommending it for either private or commercial use. The flowers are of the clearest golden yellow, perfectly double and quilled like a dahlia which it strongly resembles and the stems being stiff and straight it stands erect and for cutting or shipping purposes it has no equal. It will remain fresh in water several days after cutting, and flowers very abundantly, making it an exceedingly showy and popular variety to grow. Price and other varieties in general list.

HEMEROCALLIS.

These have been greatly improved upon in recent years over the old "Day Lily," and our collection contains the best varieties to date besides the standard sorts. We would specially recommend for large flowers Aurantiaca Major, Florham, Orange Man, and Sovereign, of which we have large stocks to draw from at very reasonable prices. See general list for varieties and price.

HOLLYHOCKS.

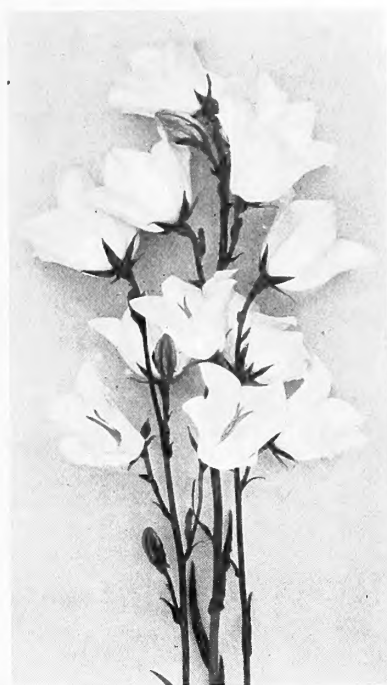

The best strains in colors, separate, grown from carefully selected seed, both double and single also the fringed type. We can furnish large two-year-old field roots or strong established pot plants, customers' choice. For price and varieties see general list.

IRIS, GERMAN and JAPAN.

We think it would be difficult to improve upon our list of varieties of these two desirable and popular hardy garden plants. They have been selected by experts and whilst our price is exceptionally low the quality of the roots is large and good. For price and varieties see general list.

LILIUMS.

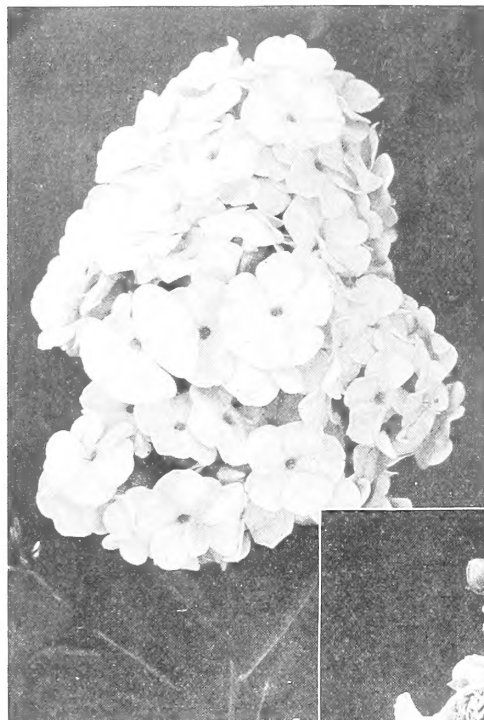

No collection of hardy plants is complete without lilies. Our list contains, besides the best Japan and

Campanula Persicifolia, the best of the family

Oriental Poppies, a gorgeous hardy plant

Phlox. Hardy Perennial

LOBELIA CARDINALIS
(Cardinal Flower).

This is a popular and very saleable native plant which thrives well in most gardens and liked whenever seen on account of its vivid scarlet flowers. We also have the native blue and white variety (Syphilitica) for which there is a considerable demand. For price and other varieties see general list.

LATHYRUS LATIFOLIUS
(Everlasting Sweet Peas).

The popular demand for sweet peas has spread to the perennial sorts which are deserving of more attention as they are very beautiful and come in various colors. They will succeed in almost any soil. We offer large field roots that will give vigorous results the first season. See general list for price and varieties.

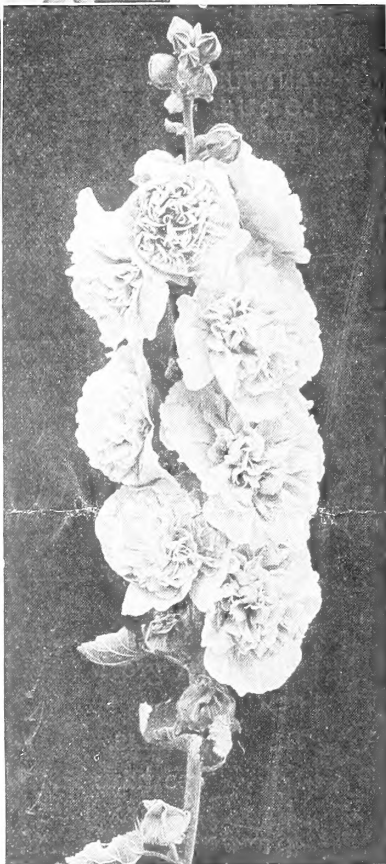

MERTENSIA VIRGINICA (Blue Bells).

We have shown this plant in flower, to many who had never before seen it, but in all instances they were instantly struck with its singular charming appearance. Flowers are light blue changing to clear pink about one foot high. Adapts itself anywhere. See general list for price.

MONARDA DIDYMA (Viola Superba).

In habit it is equally decorative as the other kinds but the color of the flowers is quite new, being a decided purple violet. See general list for other varieties and price.

European hardy sorts most of the well known native kinds, which will lend a charm to any garden at little cost and they will adapt themselves to most any situations. For varieties and price see general list.

Double Hollyhock

OENOTHERA SPECIOSA (White Evening Primrose).

This variety attracted our attention in the past summer and it is very free flowering the summer through. The plant is about 12 inches high, covered with white bell-shaped flowers on the order of a Petunia, or perhaps more like a Godetia, and where others of this class close during the day, the large flowers of this variety remain open. This is a very desirable and distinct variety that should receive marked attention, as it has so much to recommend it. See general list for varieties and price.

OMPHALODES VERNA.

The flowers of this dwarf-growing plant resembles the popular Forget-me-not, but are considerably larger and make a better showing in the borders. It succeeds with ordinary treatment anywhere and remains a permanency when Forget-me-nots usually disappear. We have them in two colors, blue and white. See general list for varieties and price.

PAEONIES.

Our collection of double Paeonies contains most of the best varieties and include the early flowering Officinalis type, but we would draw special notice to our single Chinensis Paeonies. The varieties we offer are especially fine and rare sorts. The Single Paeony is attracting more attention than all others at the present time, on account of their gorgeous coloring and the charming effects they make. For other varieties and price see general list.

PAPAVER ORIENTALE (Oriental Poppies).

A most satisfactory plant to grow. Nothing can surpass their gorgeous coloring for which reason they deserve a conspicuous place in every garden. They grow and flourish each year without care in any garden. We supply them in different colors and grow them by

the thousands. See general list for price and varieties.

PAPAVER NUDICAULE (Iceland Poppy).

This is an equally satisfactory poppy to grow. Not as robust as the preceding, but they flower continually through the entire season. See general list for varieties and price.

HARDY PHLOX.

We make a specialty of this hardy plant and list all the best varieties. We would especially recommend the following 12 sorts

Delphinium or Larkspur

Single Pompon Chrysanthemum

Prof. Schliemann.

See general list for other varieties and price.

PRIMROSES.

We have a specially fine lot of these established in pots and whilst the hardy English Primrose (*PRIMULA VULGARIS*) and the Giant Cowslip (*PRIMULA VERIS SUPERBA*) are among the best and hardiest sorts for outdoor and florists use; the *Courtesoides Sieboldi*, or Japan Primrose, is especially worthy of notice. See general list for varieties and price.

PYRETHRUM ROSEUM HYBRIDUM.

Both the double and single varieties are among the choicest of hardy plants. The flowers are very handsome, resembling a Chrysanthemum to which they belong. They flower in the early spring and as a cut flower they are grown quite extensively for market. See general list for price and varieties.

RUDBECKIA PURPUREA (Giant Purple Cone Flowers).

We have a specially fine stock of this striking plant and can supply either field grown or plants established in pots. See general list for price and other varieties.

SPIRAEA.

We stock all the desirable herbaceous kinds and have large quantities of field-grown clumps of the different varieties listed. Our prices will be found very low. See general list for prices and varieties.

STOKESIA CYANEA (Stokes' Asters).

This plant of recent introduction is very much in demand as it adapts itself readily and is of the easiest culture. See general list for description and price.

TRITOMA (Red Hot Poker).

We have a collection of the best sorts, including *Pfitzerii* and our very low prices represent large field plants. See general list for other varieties and price.

as being among the best in this class having large flowers and good form:

Artaxis.

Boule de Feu.

Caran d'Ache.

Champs Elysee.

Eugene Danzanvil-
lier.

Genl. von Heutze.

Jocelyn.

Lord Raleigh.

Mrs. E. E. Jenkins.

Miss Lingard.

Selma.

TROLLIUS (Globe Flower).

This is another very showy hardy plant that always attracts. It succeeds well in almost any situation. The large yellow globe-shaped flowers stand well up from the foliage. For price and varieties see general list.

VERONICA LONGIFOLIA SUBSESSILIS (Blue Jay Flower).

One of the finest autumn flowering plants. Its long spikes of clear blue are specially attractive, and they are at their best after most other hardy plants have done flowering. See general list for other varieties and prices.

VIOLA CORNUTA (Tufted Pansy).

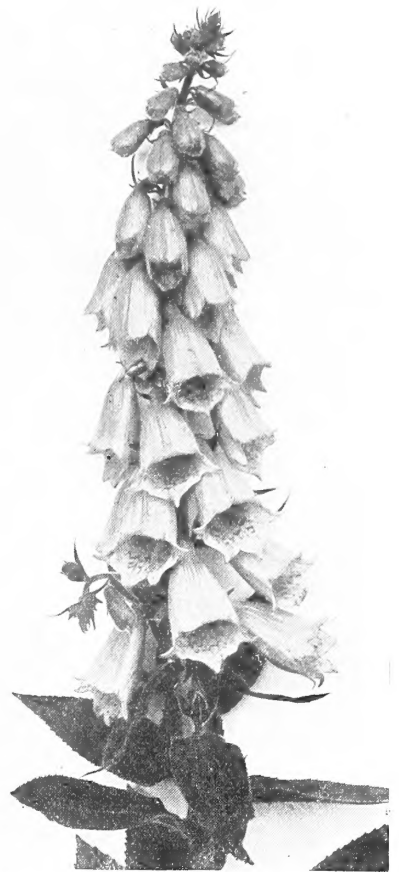

We can supply these in four colors. They recommend themselves wherever seen as they flower continuously and are almost as large as an ordinary Pansy. Quite hardy. See general list for these and other varieties of Violets and prices.

THE DEVELOPMENT OF THE DAHLIA

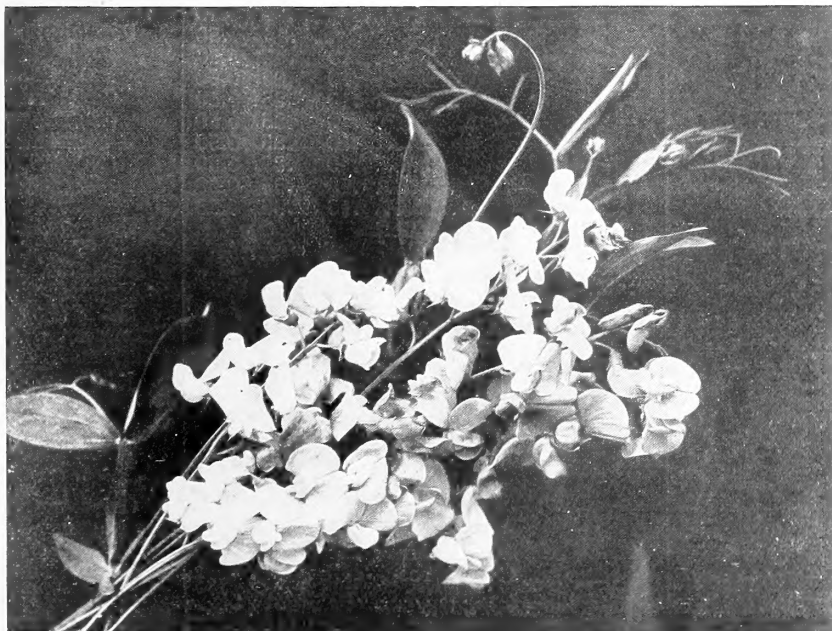

There is a steady and unmistakable tendency toward the old-fashioned flowers and the Dahlia is coming back to its own among the lovers of the hardy as well as the beautiful varieties.

This appreciation of the many splendid qualities of the plant of our grandmothers has been encouraged by leading floriculturalists who have added beauty in, and color to, the hardness of the Dahlia. The new Dahlia cannot be appreciated in the localities where the evolution of the ugly duckling to the beautiful, almost Chrysanthemum-like flower has not been noted.

For varieties, description and price, see pages 15 and 16.

IRIS. (Fleur de Lys.)

There are few hardy plants more useful and so decorative either for beds, groups, or as cut flowers. This is particularly so with the Japan section, it being quite common to find flowers measuring over six inches across, and their being perfectly hardy, increase in beauty from year to year, with very little attention.

GERMAN IRIS: (Iris

Germanica.) Early
flowering.

Alexander Von Hum-
boldt. Blue.

Bacchus. Satiny
white, edged with
blue.

Canary Bird. Soft
canary yellow.

Ceris. Pale blue vein-
ed.

Darling. Large deep
blue.

Florentina. Pure
white, veined with
lavender.

Florentina Alba. Pure
white, form of above;
large flowers.

Gracchus. Pale yel-
low and purple.

Hector. Dark blue
and purple.

Jenny Lind. Pure yel-
low, with deep pur-
plish violet; very fine

King Edward VII.
Blue and white
striped.

King of the Blues.
Rich deep blue

Lilaceus. Standard
lilac; falls blue

L'Innocence. Ivory
white.

L'Interessante. Pale
lilac blotched with
purple.

Marie. Rich blue.

Mme. Cornelia. Bright
rose.

Madam Chereau.
White feathered
edges of sky blue.

Minerva. Creamy
white, veined and
blotched with deep
purple.

Mont Blanc. White
tinted blue; extra.

Purpureus. Purple
and mauve.

Queen of May. Bright
violet and heliotrope

Stellata. Olive and
brown.

Thasveris. Pale lilac,
falls blotched with
purple.

Chinensis Single:			
Single and semi-double varieties. The			
following varieties offered under number			
are part of an importation of Japan			
grown Paeonies which flowered in this			
country for the first time last season.			
They are all very choice.			
No. 3. Single, pure white, beauti-			
fully fringed.			
No. 4. Semi-double, outer petals			
dark rose; inner petals satiny rose.			
No. 5. Single, bright rose, shading			
lighter towards the tips; yellow			
chrysanthemum-like centre; very			
pretty.			
No. 6. Semi-double, similar in form			
and color to No. 4, except that			
shading in centre of petals is not so			
regular; darker at base.			
No. 7. Single, similar in form to No.			
5; dark crimson, with slight shading.			
No. 8. Single, light satiny rose,			
shading lighter towards tips of petals			
No. 9. Single, similar to Twentieth			
Century Dahlia; large flowers of			
blush pink; outer petals streaked			
with crimson; very striking.			
No. 10. Single, rose shading to blush			
and white towards the tips of petals;			
very large flowers.			
No. 11. Single; deep crimson; very			
fine.

PHLOX:

Our collection of Phlox contains all the best and improved types to date, and whilst our acreage may not be the largest grown in this country our list of varieties is as complete as any, and the plants we send out are all strong and healthy, and can be depended upon giving an abundance of flower the first season.

For those who are not acquainted with the many varieties herein offered, and whom the brief descriptions may not assist in selection, we have marked with an asterisk such varieties as we consider the best for all purposes.

Zouave. Magenta carmine with crimson eye; large flower....	.10	.85	6.50

PHLOX DECUSSATA in MIXTURE:

In going over our Phlox during the growing season we find many sorts sporting, which are always carefully removed and thrown together in mixture. Besides these, names are sometimes lost by accident. This mixture contains some of the best types of all colors, making them suitable for massing where no particular color effect is desired. Strong field roots in mixture. **\$25.00 per 1,000; 5 cents each: 50 cents per doz.; \$3.00 per 100.**

Each. Doz. 100

PHLOX SUFFRUTICOSA
or Early Flowering
Varieties:

Dr. Hornby. Very large white, suffused with soft pink.....	.10	.85	6.50
Forward. Violet flowers, striped white10	.85	6.50

Primula Courtesoides Sieboldii:

We have a large stock of this useful plant in 3 inch pots, and can supply them in fifteen named varieties. The flowers equal the Chinese Primrose in color and size, and can be forced into bloom very quickly in a low temperature of fifty degrees. It is a grand plant for all purposes, and is certain to become a universal favorite when better known.

The fifteen varieties offered embrace all shades, from brightest red to pale rose and white.

Price, **12 cents each: \$1.00 dozen, and \$7.50 per 100.**

Collection of one each of fifteen varieties for **\$1.50.**

Each. Doz. 100

DAHLIAS

Our Dahlias have all been carefully grown on our Nurseries, and we believe our collection contains all the most desirable and standard sorts both for private and commercial use. Our prices represent strong field grown roots.

Each Doz. 100

CACTUS VARIETIES:

Loose, fluffy Chrysanthemum-like flowers.			
Albion. Large, pure white; long stiff stems.....	.15	1.50	
Arachne. Spider-like form, creamy white-edged crimson; irregular.....	.12	1.00	
Austin Cannelle. Light crimson rose.....	.15	1.50	
Bravo. Robust grower, much on the order of Catherine Duer; flowers rich Jacqueminot red, on long stiff stems, well above the foliage; one of the best for cutting; late flowering.....	.10	.75	5.50
Brunhilde. Rich plum color.....	.12	1.00	
Cannelle's Crest. Fine red variety.....	.12	1.00	
Capt. Brooks. Fiery red; good show variety.....	.12	1.25	
Capt. Broad. Glowing scarlet crimson.....	.12	1.00	
Columbia. Bright vermilion scarlet, tipped with white; very telling variety in competition.....	.12	.85	6.50
Cornucopia. Carmine scarlet, long narrow petals.....	.12	.85	6.50
Cycle. Bright rosy crimson, early and profuse.....	.12	.85	6.50
Capstan. Bright red with apricot shading; early and free flowering.....	.10	.85	6.50

DAHLIAS: Cactus Varieties—Continued

	Each	Doz.	100
Countess of Lonsdale.			
Salmon red; one of the most profuse bloomers.....	.12	1.00	7.50
Delicata. Delicate pink with light salmon shading.....	.12	1.00	7.50
Earl of Pembroke. Bright plum color...	.12	.85	6.50
Erkkoenig. Light saffron orange; shining, profuse bloomer....	.12	1.00	7.50
Fuerst Bismarck. Large, rosy crimson; bluish sheen.....	.12	1.00	7.50
Florodora. Wine crimson; one of the best Cactus Dahlias....	.15	1.50	
Gabriel. Similar to Arachne; larger flowers; no two flowers alike on the same plant..	.15	1.50	
Green's White. Large, pure white; free bloomer.....	.12	1.00	7.50
H. F. Michel. Soft yellow, turning to deep orange red....	.12	1.00	7.50
Innovation. Red and white striped; sometimes clear red or white.....	.10	.75	5.50
J. W. Wilkinson. Brilliant rose carmine, lighter than Brunhilde.....	.12	1.00	7.50
Kingfisher. Rosy purple; very early and profuse.....	.15	1.25	9.00
Kriemhilde. Brilliant pink, shading to creamy white towards the centre....	.12	1.00	7.50
Lady Pearson. A distinct shade of rosy red; most desirable sort for all purposes..	.10	.75	5.50
Loyalty. Bright coral red.....	.15	1.50	
Miss Crata Park. Fine salmon red, overlaid with orange.....	.12	1.00	7.50
Mrs. H. J. Jones. Immense flower, rich bright scarlet cream colored edge.....	.10	.75	5.50
Mrs. Sanders. Pure deep yellow flowers..	.12	1.00	
Mrs. John Findle. Clear canary yellow.....	.15	1.50	
Mrs. Stocks. Bright fiery red, petals tipped rose violet, a most desirable sort..	.10	.75	5.50
Mrs. Carter Page. Velvety dark carmine; wonderful form....	.15	1.50	
Mrs. J. P. Clark. Reddish cinnamon color; pinkish peach-colored points.....	.10	.75	5.50
Matchless. Dark maroon, velvety brown sheen.....	.12	1.00	6.50
Mrs. Dickson. Beautiful rose color, with broad petals.....	.12	1.00	6.50
Primrose Dame. The best yellow Cactus Dahlia, early and profuse.....	.10	.75	5.50
Princess Louise Victoria. Broad petals of a deep pink color, early and continuous bloomer (Paeonia Type).....	.25	2.50	
Progenitor. Bright carmine furcated petals, like staghorn fern.....	.12	1.00	
Sieglinde. Bright orange yellow.....	.12	1.00	7.50

DAHLIAS: Cactus Varieties—Continued

	Each	Doz.	100

The plants offered herein are all sturdy, either nursery grown or established in pots, and can be depended upon being true to name and giving effect by flowering satisfactorily the first season. Our stock of goods is very large, having upwards of 500,000 plants to draw from. We make a specialty of supplying Landscape Gardeners, Dealers and others in the trade. We print real prices, which, as long as unsold and without engagement, we are willing to accept. The prices are net, except being subject to five per cent. when cash accompanies order, otherwise payable in thirty days from date of invoice on approved credit. Packing charges at cost, f. o. b. Sparkill, N. Y. To meet reputable competition, we will reduce our prices still further on being given the opportunity. Six of one kind furnished at dozen rates, 25 at 100 rates, 250 at 1000 rates, unless otherwise specified.

ANGLO-AMERICAN LAWN GRASS SEED MIXTURE

The formula used in the preparation of the Anglo-American mixture is based upon that used in England for making the celebrated lawns of that country. The knowledge of this formula was acquired by ourselves after many years of experiment in Europe and the United States. Grasses in the English formula found unsuitable for the American climate have been eliminated and replaced by other more desirable sorts.

Lawn Grass is sometimes quoted by the standard bushel of 14 lbs., which is confusing and which should be borne in mind when comparing prices, as 14 lbs. of our Lawn Grass Seed would cost but \$2.45.

THE ANGLO-AMERICAN LAWN GRASS SEED is put up in one-quart and four-quart carton boxes, $\frac{1}{4}$ bushel, $\frac{1}{2}$ bushel, and one bushel canvas bags. Wholesale Price: Per quart, 15c.; 4 quarts, 55c.; $\frac{1}{4}$ bushel of 5 lbs., \$1.00; 1 bushel of 20 lbs., \$3.50. One-half bushel at bushel rates. To dealers who wish to sell our Lawn Grass we will supply it in quart packages at \$12.50 per 100 quarts, but no less than 25 quarts at this rate.
